Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 23-32, drawn to a door module/vehicle door, classified in class 49, subclass 502.
- II. Claims 15-17, drawn to a mould, classified in class 29, subclass 33R.
- III. Claims 18-22, drawn to a process of manufacturing, classified in class 29, subclass 400.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be made by a materially different process such as stamping, shaving, and sanding a door module formed of a plastic material.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a mould which is used to form a door module and a door module which is used in the operation of a vehicle door.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3634

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
